WORK EXPERIENCE

Data Analyst

Tech Mahindra Ltd, Pune

11/2021 - 05/2025

Project: Credit Risk Analysis- Performed credit risk analysis for a financial services company in the loan sector; developed a classification model to generate credit scores, enabling lenders to design data-driven lending policies.

- Developed interactive dashboards and reports using Power BI and Tableau to deliver actionable business insights.
- Performed data cleansing, transformation, and validation using SQL, Python, and Excel to ensure accuracy and consistency in financial datasets.
- Conducted data profiling and gap analysis using SQL, SAS, and Python to assess data fitness and address quality issues.
- Ensured compliance with banking regulations and data security protocols while managing financial risk data.
- Designed and automated data pipelines to streamline data movement and processing for financial reporting and risk analysis.
- Investigated data quality issues, lineage, controls, and authoritative sources, providing recommendations for improvement.
- Collaborated with cross-functional teams, including risk, finance, and IT, to enhance reporting processes and support data-driven decision-making.
- Used data analysis and statistical models to identify new financial risks, evaluate their impact, and support risk management decisions.
- Provided recommendations to business teams based on data-driven insights to improve customer engagement and revenue opportunities.
- Took ownership of risk management and control processes, ensuring compliance with internal policies and regulatory requirements.
