9011388009

Current Designation: Credit data scientist

Current Company: VERVENT Technology

Current Location: Pune

Pref. Location: Bengaluru, Remote, Hubli, Coimbatore, Kozhikode, Pune, Noida, Delhi / NCR, Ahmedabad, Mumbai

Functional Area: Data Science & Analytics

Role: Data Scientist

Industry: IT Services & Consulting

Total Experience: 3 Year(s) 9 Month(s)

Annual Salary: Rs 9.50 Lakhs

Expected CTC: Not Mentioned

Highest Degree: B.Tech/B.E.

Notice period: 1 Months

Key Skills: Python, Machine Learning, Deep Learning, Natural Language Processing, Tensorflow, Scikit-Learn, pandas, seaborn, webscrapiing, Nltk, Genism, Spacy, Neural Networks, SQL, AWS, Keras, Numpy, Matplotlib, Data Visualization, Data Analysis, ML Algorithms

Work Experience

VERVENT Technology (Current Employer)
Credit data scientist | Feb 2025

As a Credit Data Scientist, I worked on building and optimizing machine learning models for credit risk assessment, credit card default prediction, and credit limit automation. I analyzed customer credit behavior, payment history, and financial patterns to identify high-risk customers. My work included developing classification and regression models using Python and SQL, improving risk segmentation and minimizing financial losses. I collaborated with cross-functional teams to deploy data-driven strategies for pre-approval offers. I created dashboards and reports to monitor credit portfolio performance. I implemented feature engineering, data preprocessing, and model validation techniques. My models helped reduce default rates and improved decision-making accuracy. I also worked on delinquency analysis and repayment behavior prediction. My contribution supported strategic planning for safer and more efficient credit policies.
Notice Period : 1 Months

Sedin Technologies
Data Scientist | Nov 2021 To Feb 2025

Data Scientist Results-driven professional with 3.3 years of experience in Python, machine learning, and deep learning (ANN, CNN, RNN, LSTM, LLM). Skilled in delivering impactful solutions across healthcare, finance, and e-commerce domains. - Proficient in end-to-end model development, including data preprocessing, feature engineering, model training, evaluation, and optimization. - Hands-on experience in deploying machine learning models on AWS for scalability and efficiency. - Strong expertise in SQL for data extraction, transformation, and analysis to drive actionable insights. - Developed and deployed predictive models for credit card defaulter detection to reduce financial risk. - Designed an image recognition system for diagnosing ankle joint conditions, aiding in medical decisions. - Built sentiment analysis models for public opinion analysis during election campaigns. - Proficient in NLP techniques for sentiment analysis and text classification tasks. - Delivered predictive analytics solutions to optimize customer acquisition and retention in e-commerce. - Experienced in integrating machine learning workflows with AWS cloud computing services. - Skilled in applying advanced deep learning architectures for computer vision and natural language processing. - Collaborated with cross-functional teams to align data science projects with business goals. - Adept at using data-driven approaches to solve complex business problems and generate insights. - Skilled in creating and optimizing machine learning pipelines for real-world applications. - Knowledgeable in using statistical methods and hypothesis testing to validate models. - Experienced in working with unstructured and structured datasets for diverse analytical needs. - Strong understanding of data visualization tools to communicate findings effectively. - Passionate about driving innovation in AI and ML to create impactful solutions.

Education

Undergraduates (Others)
B.Tech/B.E. (Civil)
Shivaji University, Maharashtra | in 2021

Projects

(NLP)-Customer Sentiment Analysis and Root Causes.

- | Offsite | Full Time | from May 2022 to Jan 2023

Skill Used:

Role :

Role Description:

Project Details: Objective: Developed an NLP-based system to analyze customer sentiment and identify root causes of declining demand for instant hot water geysers. Leveraged sentiment analysis techniques to extract insights from customer reviews and feedback. Provided actionable recommendations to address key issues and improve product demand.

Project 1: "CNN-Based Image Analysis for Ankle Osteoarthritis Detection from X-Ray Data"

- | Offsite | Full Time | from Apr 2023 to Nov 2023

BENGLORE

Skill Used: Python, Pandas, Deep Learning, AWS, SQL

Team Size: 8

Role : Programmer

Role Description: Key Responsibilities: • Collaborated with healthcare professionals to understand domainspecific diagnostic needs. • Conducted data collection and preprocessing, including image augmentation, resizing, and normalization. • Engineered features,

Project Details: Project 1: "CNN-Based Image Analysis for Ankle Osteoarthritis Detection from X-Ray Data" Problem: Diagnosing human ankle conditions manually from X-ray/MRI scans was prone to errors and time-intensive for Radiologists. Solution: Built a CNN-based DICOM/PNG X-ray image recognition system achieving 92.48% accuracy to classify ankle conditions into: Normal Ankle, Osteoarthritis (bone-end rubbing) Rheumatoid Arthritis (bone erosion)

Project 2: "CNN-Based Hydronephrosis Detection System Using X-Ray Images for Pediatric Diagnosis"

- | Offsite | Full Time | from Apr 2023 to May 2024

Skill Used:

Role :

Role Description:

Project Details: Project 2: "CNN-Based Hydronephrosis Detection System Using X-Ray Images for Pediatric Diagnosis" Problem: Detecting diagnosing pediatric hydronephrosis using traditional methods lacked consistency and scalability for large-scale diagnoses. Solution: Developed a CNN-based model for diagnosing pediatric hydronephrosis, analyzing X-ray images to classify kidneys into normal, mild, moderate, and severe categories, Aiding early detection and treatment planning.

Project 1: “Credit Card Pre Approval Offer Model Using Machine Learning

- | Offsite | Full Time | from Oct 2023 to Nov 2024

BENGLORE

Skill Used: Python, Machine Learning, AWS, SQL Flask

Team Size: 15

Role : Sr. Project Leader

Role Description: Key Responsibilities: • Collaborated with domain experts, business analysts, and clients for data collection and requirements gathering. • Conducted EDA, data preprocessing, and created data visualizations to derive actionable insights using Python,

Project Details: 1. Machine Learning: Banking For Single client we build Two ML model according to Given problem: Project 1: “Credit Card Pre Approval Offer Model Using Machine Learning for Accelerated Customer Onboarding” Problem: Financial institutions faced challenges in identifying trusted customers for pre-approved credit card offers, leading to inefficiencies and customer dissatisfaction. Solution: Developed a classification model to efficiently target trusted customers for credit card offers, improving offer acceptance rates and reducing the risk of issuing cards to high-risk applicants.

Project 2: "Optimizing Credit Card Limit Updation Processes Through Automated Regression Algorithms"

- | Offsite | Full Time | from Apr 2024 to Nov 2024

BENGLORE

Skill Used: Python, Machine Learning, aws SQL, Flask Web Framework

Team Size: 12

Role : Sr. Project Leader

Role Description: Key Responsibilities: • Collaborated with domain experts, business analysts, and clients for data collection and requirements gathering. • Conducted EDA, data preprocessing, and created data visualizations to derive actionable insights using Python,

Project Details: Problem: Manual credit limit updates for customers were time-intensive, error-prone, and lacked consistency, affecting customer satisfaction and operational efficiency. Solution: Developed a regression model to automate credit limit adjustments based on customer behavior, increasing operational efficiency by 30%, reducing processing time by 40%, and improving customer satisfaction through faster and more consistent service delivery.

Other Details

Personal Detail

Date of Birth: 01 Oct 1996

Gender: Male

Marital Status: Single/unmarried

Address:

indiranagar 560038

Home Town: Bengloru

Desired Job Details

Job Type: Permanent

Employment Status: Full Time

Work Authorization

US Work Status: Need H1 Visa

Countries: Nepal

Affirmative Action

Category: OBC- Non-Creamy

Physically Challenged: No
