PROFESSIONAL SUMMARY:

Experienced **Machine Learning with 3+ years** in the IT industry, specializing machine learning, NLP, and deep learning. Skilled in predictive modeling, data analytics, LLMs, GenAI and MLOps, optimizing models for business impact. Proven track record in deploying AI solutions for finance, retail, and document intelligence, enhancing decision-making and efficiency. Seeking to drive innovation in a data-driven organization. and deploying production-ready models.

KEY SKILLS

Languages & Libraries : Python, NumPy, Pandas, SciPy, Scikit-learn, Seaborn, Matplotlib, Flask, FastAPI, Streamlit.

Machine Learning : Decision Trees, Regression (Linear, Ridge, Lasso), Classification, KNN, SVM, Ensemble Models, Boosting & Bagging, Random Forest.

Unsupervised Learning : Clustering, Dimensionality Reduction, Anomaly Detection, Frequency Pattern Analysis

Deep Learning : BERT, Transformers, Attention Models, LSTM, CNN, RNN, Encoder-Decoder Models, Pytorch, TensorFlow & Keras, Object Detection, Computer Vision.

NLP : Text Representation, Text Classification & Clustering, Word Embeddings, NLTK, Spacy, Gensim, TextBlob, BOW, TF-IDF.

LLMs & Generative AI : RAG, LLM Fundamentals, Generative AI, Prompt Engineering.

Tools & APIs: Gemini API, OpenAI, Hugging Face, LangChain

Vector Databases: FAISS, ChromaDB, Pinecone

Cloud : AWS: EC2, S3, SageMaker, AWS Containers, Multi-cloud Deployment.

Other: SQL, RDBMS, MLOps, Data Analytics, Data Processing, Pattern Recognition, Applied Mathematics, Predictive Maintenance & Modeling, Mathematics & Statistics.

PROFESSIONAL EXPERIENCE

Cadential Technologies Private Limited, Bangalore

JAN 2022 - MAR 2025

Machine Learning Engineer

- Developed and deployed machine learning algorithms for predictive modeling and classification tasks, focusing on accuracy and efficiency optimization.
- Conducted detailed data analysis and feature engineering to extract actionable insights for informed decision-making.
- Implemented machine learning algorithms, emphasizing accuracy optimization through continuous improvement.
- Collaborated cross-functionally to design and deploy scalable ML systems, ensuring reliability and performance in production environments.

PROJECTS :

● **Credit Risk Modeling**

Objective: To identify risky borrowers and ensure that bank minimize loss while maximizing returns.

- Developed a credit risk modeling project using machine learning algorithms to predict the likelihood of loan default, **achieving an accuracy of 85%.**
- Built a predictive model that identified high-risk borrowers, enabling potential **losses reduction by 20%**
- Utilized data preprocessing, feature engineering, and model evaluation techniques to create a robust credit risk assessment framework.
- Demonstrated expertise in working with financial data, statistical analysis, and model development, showcasing ability to drive business growth through data-driven insights.

- **Developed an ML model for retail pricing optimization, leveraging customer behavior and competitive data to determine optimal product prices :**
 - Created and deployed a revenue-boosting ML model for retail pricing, **increasing revenue by 12%**
 - Utilized customer behavior and competitive data to determine optimal prices, **improving profit margins by 8%.**
 - Designed data pipeline integrating customer data, market trends, and pricing for data-driven decisions.
 - Worked with cross-functional teams to integrate the model into existing pricing systems.
 - Designed data pipeline integrating customer data, market trends, and pricing for data-driven decisions.
 - Worked with cross-functional teams to integrate the model into existing pricing systems.
 - Analyzed model performance and provided insights to stakeholders, driving business growth and informed pricing decisions.
 - **Chat with Multiple PDFs Using LLMs and RAG**
 - Automated document analysis – Reduced manual effort in searching and summarizing PDFs.
 - Enhanced knowledge retrieval – Improved accuracy in extracting insights from unstructured text.
 - Faster decision-making: Enabled real-time Q&A over legal, financial, and research documents.
 - Scalable & efficient: Used vector databases for quick and accurate information retrieval.
-

EDUCATION

Gondwana University Gadchiroli.
Bachelor of Engineering (B.Tech)

2019

Bachelor of Computer Science and Engineering

ONSITE EXPOSURE

- Impactful, production-ready data science projects.
 - Model deployment, integration, and optimization.
 - Conducted onsite data collection, preprocessing, and requirement analysis for AI solutions.
 - Presented AI-driven insights to clients, ensuring business impact and adoption.
-

Certifications

- Complete Data Science, Machine Learning, DL, NLP Bootcamp – Udemy (March 2025)
- Complete Generative AI Course With Langchain and Huggingface – Udemy (April 2025)
