SUMMARY

Results-driven Data Scientist with **3.5+ years of experience** in machine learning, predictive modeling, and analytics, with deep expertise in **BFSI and automobile domains**. Proven ability to design scalable ML pipelines, optimize model performance, and collaborate directly with business stakeholders to drive decisions. Skilled in **Python, PySpark, SQL, XGBoost, MLflow, Tableau, and Databricks**. Adept at building explainable models, monitoring model drift, and integrating outputs into production environments. Strong communicator with experience delivering end-to-end solutions.

EXPERIENCE

Data Scientist, Nagarro, Jaipur, India

Jun 2024 - Present

- Collaborated with client-side **data science lead** to explain **model logic**, identify **biases**, and present **insights**.
- Designed an **XGBoost-based Customer Churn Prediction (CCP) model**, optimizing features using **SelectFromModel and Recursive Feature Elimination (RFE)**.
- Implemented **model drift detection and monitoring in MLflow**, ensuring retraining upon significant data changes.
- Collaborated with **client-side Data Science Project Caretaker**, explaining **model assumptions, bias detection, and performance insights**.
- Delivered **model outputs via APIs**, integrating results with service centers and call centers, and supported performance reporting through **Tableau and Seaborn**.

Associate Data Scientist, Nagarro, Jaipur, India

Jun 2022 - May 2024

- Led **Credit Risk Model development** for micro-credit banking, predicting **loan default probabilities** based on **non-traditional income indicators** (e.g., assets, furniture, vehicle ownership).
- Conducted **cluster analysis** to identify **high-default regions**, improving risk segmentation for banking services.
- Built and optimized **automobile service date prediction models**, integrating them into **client SAP systems via APIs**.
- Used **PySpark and SQL** for handling **large-scale banking and automobile datasets**, ensuring data integrity and processing efficiency.
- Mentored an **intern on ML project**, guiding them through **feature engineering, and model validation**.

Data Analyst, ICICI Bank, Hyderabad, India

Dec 2021 - May 2022

- Developed a **Customer Behavioral Scorecard** achieving a **Gini score of 0.82** for improved loan risk assessment.
- Conducted **EDA using Python**, identifying key attributes for **loan pre-approval** and customer profiling.
- Utilized **feature selection techniques** to retrain models on **latest data trends**, ensuring stability in credit risk evaluations.
- Finalized **model outputs in Excel**, distributing reports to key decision-makers via **email** for strategic loan disbursement.
- Assisted in **cross-functional collaboration** to align data-driven insights with **business objectives**.

EDUCATION

Indian Institute of Technology, Delhi, Delhi, India - *Bachelor's degree, Textile Sciences and Engineering, Textile Sciences and Engineering*

2014 - 2019

Co-authored a **research paper on fire-retardant behavior of ZnO in textiles**, published in *Elsevier*.

PROJECTS

End-to-End ML Engineer | MLflow | Churn Prediction, GitHub, [Link](#)

- Built and deployed a production-ready customer churn prediction system using Python, Scikit-learn, and XGBoost. Logged experiments via MLflow with auto-selection of best model, and served results through a Streamlit web app and REST API. Designed the pipeline to be modular, reproducible, and scalable for real-world applications.

SKILLS

Programming : Python, SQL, PySpark

Machine Learning : XGBoost, Logistic Regression, TensorFlow, Classification, Decision Trees, Ilm

Cloud : Databricks, MLflow, Azure, Data Pipeline, MLops, Flask, steamlit

Data analysis : Tableau, Power BI, Matplotlib, Data Analytics, Advanced Analytics, Applied Statistics

Soft Skills : Critical Thinking, Business Value, Communication Skills, Presentation Skills
