

Pratyush Das

pratyushdas096@gmail.com | 6370198026 | Bengaluru

Professional Summary

- 4+ years of experience as a Data Analyst/Data Scientist with a strong background in Banking Analytics and Advanced Data Science applications.
- Skilled in end-to-end data analysis using **Python, SQL, Excel (Advanced), and SAS**, with a strong foundation in structured data management.
- Proficient in developing statistical models, feature engineering, and machine learning algorithms to support risk analysis and business strategy.
- Experience in building interactive dashboards and visual reports using **Power BI and Tableau** to provide actionable insights to stakeholders.
- Strong focus on data validation, performance monitoring, and automation to enhance decision-making and operational efficiency in banking analytics.

Technical Skills

Programming Tools: Excel (Base & Advanced), SQL Server, Python, SAS (Base & Advanced)

Data Processing & Transformation: Data Cleaning, ETL, Data Structuring

Model Development & Validation: Machine Learning, Model Evaluation, Statistical Analysis

Data Visualisation & Reporting: Power BI, Tableau, Excel (Pivot Analysis)

Professional Experience

Molars Technologies Pvt. Ltd.

Retail Banking Credit Risk Domain

May 2021 – Present

- **Economic Capital Modeling and Improvement**
Conducted independent validation and enhancement of economic capital models using **Python** and **SQL**. Developed challenger models with **XGBoost** that improved **RMSE by 13%**, strengthening risk forecasting and capital allocation strategies.
- **LGD (Loss Given Default) Model Validation**
Performed statistical validation using **PSI** to test input data stability and representativeness. Evaluated model performance using **adjusted R²** and **MAPE**. Delivered validation reports ensuring regulatory compliance.
- **Credit Risk Model Development and Validation**
Built and validated machine learning-based credit risk models using Python, **SMOTE** for class imbalance, and **OneHotEncoding** for categorical handling. Conducted hyperparameter optimization with **GridSearchCV**.
- **Reporting and Business Communication**
Created performance reports and automated dashboards using **Excel** and **Power BI** to communicate model KPIs, capital adequacy trends, and risk segmentation to business stakeholders.
- **Automation of Model Tuning Process**
Automated hyperparameter tuning pipelines in Python using **GridSearchCV**. Reduced manual intervention, improving model development efficiency and reproducibility.
- **Collection Strategy Analytics**
Analyzed borrower delinquency trends using **Python** and **SQL** to optimize collection strategies. Integrated model outputs into early warning systems to reduce default rates.
- **Data Preparation and Governance**
Managed full data pipelines using **SQL** and **SAS**: performed data extraction, cleaning, transformation, and validation. Ensured data quality through audits and documented lineage for compliance.

Education

Veer Surendra Sai University of Technology, Burla, Odisha
B.Tech

Aug 2014- May 2018
