Specialization: Data Analytics, Credit Risk Strategy, Predictive Modeling, A/B Testing, Customer Segmentation, Hypothesis Testing

Programming Tools: SQL, Python, SAS, PowerBI, MS Excel,

Technical Methods: Regression (Linear, Logistic), Scikit-learn, GenAI (AI Agents, Prompt Engineering), Multi AI Agent Workflow

Libraries: Pandas, NumPy, SciPy, Matplotlib, Plotly, Seaborn

Professional Skills: Leadership, Decision Making, Stakeholder Management, Collaboration, Analytical Thinking, Data Storytelling

WORK EXPERIENCE

Strategy Associate - (Risk Strategy - Commercial Card Portfolio)

May 2023 — Present

Vayana

Pune, MH

- Designed and developed end-to-end AI agentic workflow, automating sales funnel optimization & customer filtering, document parsing and data extraction, underwriting, and credit decision employing multi-agent model. Projected to 10x conversion rate and 8-10% reduction in customer onboarding costs.
- Employed RFM analysis for high-level customer segmentation targeting platform engagement, credit utilization, and feature adoption. Collaborated with cross-functional team to implement targeted strategies using propensity score, business health, and A/B testing; achieving 8% increase in gross revenue.
- Led analytics strategy to identify high-risk borrowers using transaction data, temporal credit utilization, & repayment patterns; aligned stakeholders to optimize credit limits and block high-risk transactions; reducing over INR 30 crores of risky exposure.
- Developed portfolio review framework, utilizing financial performances, GST data, & ratings for enhanced risk segmentation. Enabling category-based line management & policy adjustments leading to 4% reduction in early-stage delinquencies.
- Conducted a deep-dive diagnostic analysis on the product usage pattern across customer segments using cohort analysis and formulated data-driven cross-sell strategy across product portfolios, resulting in a 7% increase in average revenue per account.
- Provided industry and macroeconomic research support to the CEO and CFO, conducted in-depth peer analysis, and developed compelling pitch deck that contributed to successful USD 21 million equity fundraise.
- Collaborated with the World Bank Team to design survey questionnaires and monitor surveys, performed data cleaning, transformation, and statistical analysis of the survey data to uncover key insights for the study on MSME financing challenges.

Analyst - (Risk Strategy - Commercial Card Portfolio)

Jun 2022 — May 2023

Vayana

Pune, MH

- Resolved transaction authorization declines through segmentation analysis and implemented tailored credit line and cross-sell strategies for power users, achieving 10% reduction in transaction declines and 4% increase in platform features cross-sell.
- Consolidated raw business data from multiple CRM systems into a structured database, ensuring data accuracy, and compliance with the MIS framework for the quarterly management review.
- Developed comprehensive reporting and dashboarding infrastructure for the commercial card product using Power BI, providing actionable insights into the portfolio of ~ INR 2500 crs with a strong focus on PnL optimization.

ACADEMIC PROJECTS

Land Reform and Educational Outcome: An Evidence from West Bengal - Development Economics

Jun 2022

- Consolidated, cleaned and transformed IHDS microdata (42,000 Households) and Land Reform data across states in India.
- Identified the causal impact of land reforms on educational outcomes using cohort analysis and fixed effects regression model.

Predicting Social Mobility using Google Data Commons - Data Science& IRS data

May 2021

- Combined Google Data Commons with 121 income tax variables to predict inter-generational mobility in 2518 US counties.
- Built a Random Forest classifier that achieved 93% accuracy and AUC of 0.87, optimized through feature engineering and selection.
- Predicted mobility trends for every county, useful for guiding policymakers towards initiatives to boost social mobility.
