Education

Delhi Technological University (DTU) Bachelor of Technology in Information Technology	<i>Aug 2024 – May 2028</i> CGPA: 8.06
Delhi Public School Ghaziabad (DPSG) Secondary School (Class XII)	<i>Apr 2021 – May 2023</i> 12th Grade: 88.6%
Delhi Public School Ghaziabad (DPSG) High School (Class X)	<i>Apr 2019 – May 2021</i> 10th Grade: 93.8%

Technical Skills

Languages: Python, C++, SQL, Bash
ML/DL Frameworks: PyTorch, TensorFlow, Scikit-learn, LightGBM, OpenCV, Hugging Face, NumPy, Pandas
ML Concepts: CNNs, Transformers, Self-Supervised Learning, RAG, NLP, Computer Vision, Feature Extraction
Tools & Deployment: Git, Docker, MLOps (WandB/MLflow), Apktool, Streamlit, Linux, VS Code, Jupyter
Coursework: Data Structures and Algorithms, Object-Oriented Programming, Discrete Mathematics

Experience

AI Engineer Intern ArchiGen AI Labs Pvt. Ltd.	<i>Feb 2026 – Apr 2026</i>
- Architected data preprocessing pipelines for large-scale datasets, accelerating model training convergence by 25% via optimized batching and feature engineering. - Spearheaded prompt engineering and Retrieval-Augmented Generation (RAG) workflows, improving system response accuracy by 30% for enterprise AI integrations. - Collaborated with engineering teams to deploy fine-tuned machine learning models, aligning system architectures directly with the organizational technical roadmap.	
Co-Founder Green Lungs Universal Foundation (GLUF)	<i>Jan 2025 – Present</i>
- Scaled a youth-led environmental NGO into a registered foundation, directing cross-functional teams to secure operational partnerships with Municipal Corporation Ghaziabad. - Engineered a digital event-tracking system to optimize operational efficiency, improving resource allocation for drives and increasing overall participation by 30%. - Orchestrated urban afforestation campaigns, mobilizing 100+ volunteers and securing institutional backing to successfully plant 100+ trees across the university campus.	
President (First Year Hostel) Delhi Technological University	<i>Aug 2024 – May 2025</i>
Directed infrastructure and welfare initiatives for 500+ residents, negotiating with university administration to resolve operational bottlenecks and improve living standards.	

Project Experience

End-to-End Android Malware Detection Pipeline <i>Scikit-Learn, LightGBM, Apktool</i>	GitHub
- Engineered a mathematically secure MLOps pipeline for classifying Android malware using the CIC-AndMal2017 dataset, navigating an 80/20 class imbalance to achieve a 90.8% Malicious Recall. - Developed a custom ETL process leveraging Apktool to reverse-engineer raw APK binaries, extracting a 1,418-dimensional sparse binary feature matrix from decoded manifests. - Eradicated data leakage by architecting a strict Stratified K-Fold cross-validation framework where feature selection and SMOTE rebalancing occurred within encapsulated folds. - Benchmarked 20+ algorithmic architectures and performed Out-Of-Fold (OOF) Threshold Calibration, optimizing the decision boundary to 0.3225 to align with enterprise SOC standards.	
Hyperspectral Foundation Model <i>PyTorch, t-SNE, UMAP</i>	GitHub
- Developed a Masked Autoencoder (MAE) for hyperspectral imagery, increasing downstream classification separability by 20% through transferable spatial-spectral embeddings. - Automated the end-to-end data preprocessing pipeline, reducing manual intervention by 40% and ensuring reproducible dataset curation for land cover classification. - Streamlined research-oriented data preparation, achieving a 25% reduction in pre-training latency via efficient patch-based masking techniques.	

Achievements

- Secured 99.59 percentile in JEE Mains 2024, ranking in the top 0.5% nationwide among 1.2 million candidates.
- Won Silver Medal in Handball at Aavahan Sports Fest, Delhi Technological University.
